

MAiD in Canada: Results

Health Canada Interim Reports

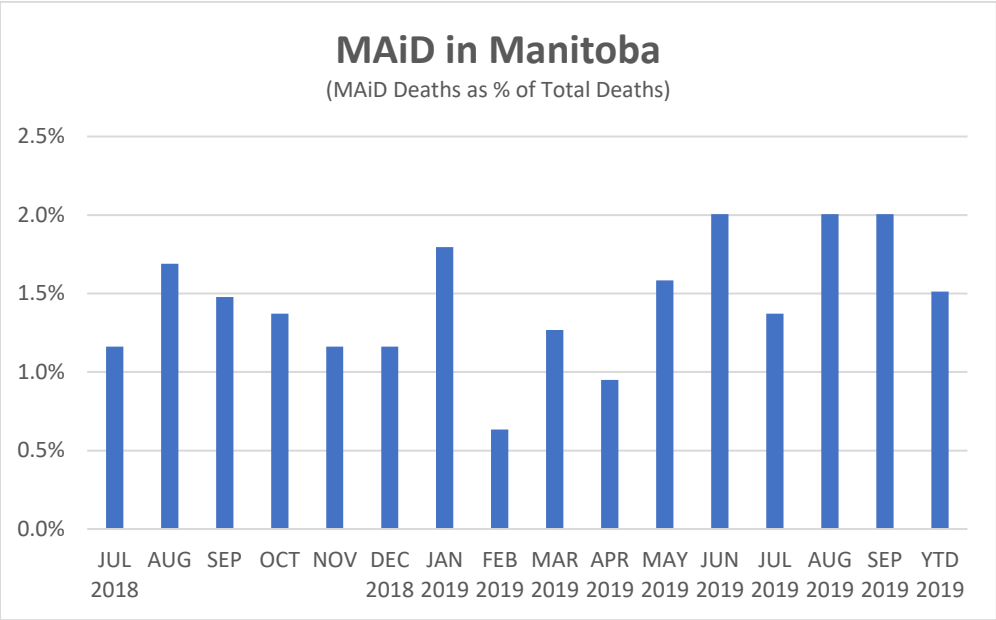

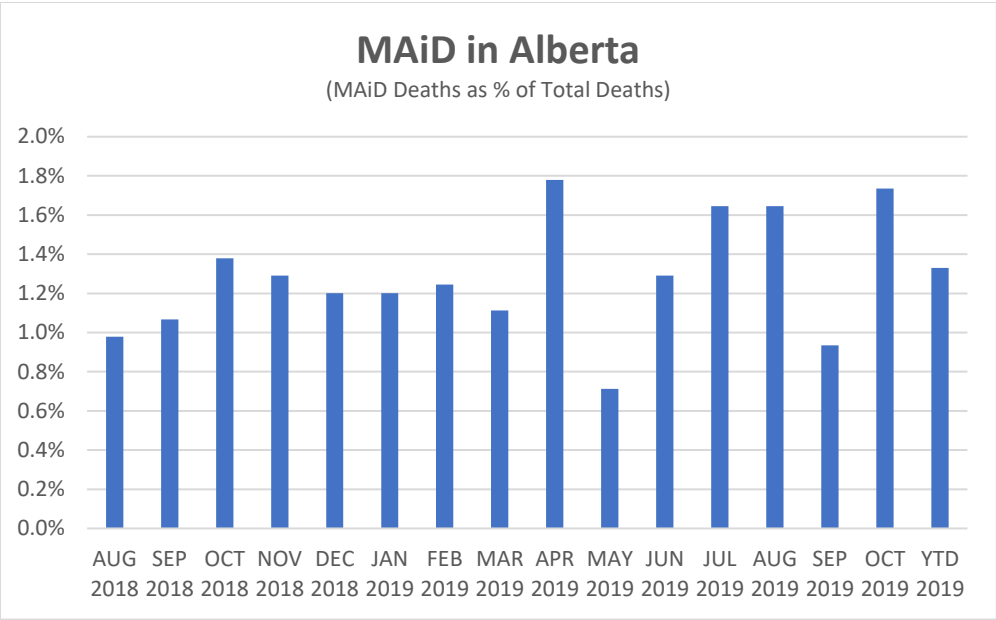

NOTES: *Health Canada* issued four (4) Interim Reports covering periods of JUN-DEC 2016, JAN-JUN 2017, JUL-DEC 2017 and JAN-OCT 2018, respectively. These reports showed total deaths. The calculation of MAiD deaths as % of Total Deaths allows for comparison of accessibility of MAiD in various provinces and regions. The calculations are by the author. Total deaths, all causes, is taken from Statistics Canada public data.

Provincial Data: Results for provinces shown in this report are results for total MAiD deaths each month provided on a monthly basis. The author calculates MAiD deaths as % of all deaths in each case. Total deaths by province is from Statistics Canada public data.

NOTES: MAiD results for BC are available for each Health Authority. They were provided by the Coroner until OCT 2018. For NOV 2018 onwards, results are provided by MAiD Oversight Unit. Results are quarterly from JUN 2019 onwards.

NOTE: Island Health has a unique decentralized approach at providing access to MAiD.
